

Non Insulated With Brazed Seam 0.5-6mm2 22-10AWG Copper Ring Lug Terminal Tin Plated

Basic Information

Place of Origin: CHINABrand Name: TLC

Certification:
 UL, CUL, CE

Model Number: RNB
Minimum Order Quantity: 1000
Price: USD
Packaging Details: Carton

• Delivery Time: 5-30 working days

Payment Terms: T/T

Supply Ability: 1KK pcs per month

Product Specification

Material: CopperPlated: TinColor: Silver

Insulated Type: Non-insulated
 Fixing Type: With Brazed Seam
 Name: Ring Cable Lugs
 Application: Cable Connections

Packaging: BagShape: Ring

• Highlight: 6mm2 Copper Ring Lug Terminal,

10AWG Copper Ring Lug Terminal, 22AWG non insulated cable lugs

Product Description

A non-insulated terminal is an electrical connector used to connect or secure a wire, which is usually made of metal material and does not have an insulating function. Non-insulated terminals are widely used in electrical and electronic equipment, automotive industry, home appliances and other fields.

Non-insulated terminals are usually made of conductive materials (such as copper, aluminum, etc.) and have good conductivity properties to achieve reliable electrical connections. They come in a variety of shapes and sizes, including round, flat, U-shaped, F-shaped, etc., to suit different connection needs. Non-insulated terminals can be bolted, crimped, or welded to the wire.

Non-Insulated with Brazed Seam
