Product Description:

Cable Lugs are integral parts of electrical systems, playing an important role in connecting wires or cables to various electrical devices and equipment.

Tube Lugs are small metal connectors that are crimped or soldered onto the terminations of wires, allowing the wires to be securely and reliably attached to the designated terminals. This is achieved in a variety of sizes and shapes, tailoring to different wire gauges and types of terminals.

Applications:

Tube Cable Lugs

TLC's Tube Cable Lugs, model TLK, are a perfect choice for a wide range of applications. These lugs are made of copper and are silver in color, with a temperature range of -40 ~+105 . They are available in a variety of sizes, ranging from 2.5-10mm2. The lugs can be tin plated, and are delivered in carton boxes of 1000 pieces. Delivery times vary from 5-30 days.

Tube Cable Lugs are widely used in a variety of industries, such as automotive, engineering, home and industrial automation, and more. They are perfect for making reliable electrical connections in tight spaces, as they are small and lightweight. The lugs are easy to install and are designed to withstand the rigors of frequent use. The lugs are also corrosion-resistant and provide superior electrical insulation. TLC's Tube Cable Lugs are a reliable and cost-effective solution for any of your electrical connection needs. With their quality design, superior performance, and fast delivery, they are sure to meet your expectations.
