

150-300mm² Round Copper Tube Terminals For Electrical Connectors Non Insulated Cable Lug

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: TLC
- Certification: UL, CUL, CE
- Model Number: TYF, T
- Minimum Order Quantity: 1000
- Price: USD
- Packaging Details: bag, carton package
- Delivery Time: 5-30 working days
- Payment Terms: T/T
- Supply Ability: 800K pcs per month

Product Specification

- Application: Electrical Connections
- Product Name: Copper Tube Terminals
- Material: Copper
- Color: Silver
- Shape: Round
- Package: Carton
- Highlight: **300mm² Round Copper Tube Terminals,
150mm² Round Copper Tube Terminals,
Non Insulated Cable Lug 150mm²**

Non-Insulated - Copper Lugs

TUBULAR LUGS TERMINALS

Material
Terminal Body: Copper
Plating: Tin

Product Description:

Lugs terminals are essential components in electrical systems, playing a crucial role in creating secure and reliable connections between wires or cables and electrical devices or equipment. Proper installation is a must for any electrical system, in order to ensure optimal electrical performance and safety.

With their function of coupling two or more conductor strands into a single and secure connection, lugs terminals provide a reliable connection and can prevent any hazard, by ensuring insulation between a power source and a load.

Moreover, they offer an easy and safe way of connecting two conductors without requiring complex tools. They also come with a wide variety of types and sizes, allowing the use of the most suitable for any specific project.

Features:

Lugs terminals are an important part of electrical systems. They act as a bridge between the wires and cables to connect various types of electrical devices and equipments.

Lugs are small metal connectors that provide tight connection and support to the wires. These connectors come in different sizes and shapes to match different wire gauges and terminals.

Applications:

The combination of lugs and terminals is important for guaranteeing a reliable and robust electrical connection. This is essential for successful energy and signal transmission between devices. The correct installation of lugs and terminals helps to avoid any kind of loose connection, that might result in poor performance, high temperatures or even clandestine electric breakdown.

Support and Services:

Technical Support and Service for Copper Tube Terminals

We provide comprehensive technical support and service for copper tube terminals. Our team of trained professionals can help with any questions you might have about copper tube terminals. We offer installation services, as well as troubleshooting and repair services.

We also provide maintenance and inspection services for copper tube terminals. Our services include cleaning, lubrication, and replacement of parts as needed. We also provide training sessions for personnel to ensure proper use and maintenance of copper tube terminals.

We are committed to providing top-notch customer service and technical support for copper tube terminals. We are available to help you at any time and provide prompt and reliable solutions to any issues you may have. Contact us today for more information about our technical support and service for copper tube terminals.

Packing and Shipping:

Packaging and Shipping of Copper Tube Terminals

Copper Tube Terminals are packaged in cardboard boxes with the product safely enclosed and protected from damage during shipping. Products are shipped in a timely manner using the most reliable and cost-effective shipping carrier.

All products are packaged in sturdy cardboard boxes to ensure safe delivery to the customer. The boxes are securely closed with strong tape to protect from water damage or accidental opening during shipping.

Shipping is done via the most cost-effective and reliable shipping carrier available. Products are shipped out within 1-2 business days of the order being placed. Customers will be provided with a tracking number for their order.

FAQ:

Q1: What is the Brand Name of Copper Tube Terminals?

A1: The Brand Name of Copper Tube Terminals is TLC.

Q2: What are the Model Numbers of Copper Tube Terminals?

A2: The Model Numbers of Copper Tube Terminals are TYF and T.

Q3: Where is the Place of Origin of Copper Tube Terminals?

A3: The Place of Origin of Copper Tube Terminals is China.

Q4: What Certifications does Copper Tube Terminals have?

A4: Copper Tube Terminals has UL, CUL, CE Certifications.

Q5: What is the Minimum Order Quantity of Copper Tube Terminals?

A5: The Minimum Order Quantity of Copper Tube Terminals is 1000.
