

10-300mm² Round Electrical Copper Tube Terminals A2-M5 A10 B-M6 Non Insulated A30 B-M10

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: TLC
- Certification: UL, CUL, CE
- Model Number: A
- Minimum Order Quantity: 1000
- Price: USD
- Packaging Details: bag, carton package
- Delivery Time: 5-30 working days
- Payment Terms: T/T
- Supply Ability: 800K pcs per month

Product Specification

- Material: Copper
- Shape: Round
- Color: Silver
- Package: Carton
- Application: Electrical Connections
- Product Name: Copper Tube Terminals
- Highlight: **Electrical Copper Tube Terminals A2 M5, 300mm² Round Copper Tube Terminals, B-M6 non insulated terminal**

Product Description

Non-Insulated - Copper Lugs

ATB-M COPPER TUBE LUG TERMINALS

Material
Terminal Body: Copper
Plating: Tin

WIRE RANGE mm ² (A.W.G)	ITEM NO	DIMENSION mm(inch)						P/N	QTY BOX

TLC TERMINALS INC.
Terminals

Product Description:

Lugs terminals are critical elements in electrical systems since they are capable of providing strong and dependable connections between wires, cables and electrical devices or equipment. Moreover, their appropriate installation is a must for guaranteeing the optimal performance and safety of electrical systems.

For example, a bad or incorrect installation of lugs terminals will likely lead to serious issues such as electric short circuits or circuit blasts. These problems will not only deteriorate the performance of the system, but may also result in some accidental injuries. Therefore, it is necessary to carry out the installation of lugs terminals carefully in order to avoid these potential mishaps.

Features:

Lugs terminals are essential components in electrical systems, which serve a very critical role in connecting wires and cables to various electrical devices or equipment.

These lugs are usually small metal connectors that are attached to the ends of wires. They can be crimped or soldered onto the ends of wires to secure and reliable connection with the terminals.

Because of it's importance, lugs are available in various sizes and shapes to match different types and gauges of wires and terminals.

Applications:

A rigorous combination of lugs and terminals makes for a reliable and sturdy electrical connection. This is of utmost importance if one wishes for efficient electricity transfer or signal transmission between devices. The correct arrangement of lugs and terminals will prevent any deteriorated contacts, which could in consequence result in poor operations, abnormal heat emission, and potentially even electrical breakdowns.

Support and Services:

Copper Tube Terminals Technical Support and Services

We offer technical support and services for any copper tube terminals purchased from our company. Our team of experts can provide assistance in the following areas:

Installation and assembly

Troubleshooting and maintenance

Product recommendations

Warranty and repair services

If you have any questions or concerns about our copper tube terminals, please don't hesitate to contact us. Our support team is available 24/7 to provide the assistance you need.

Packing and Shipping:

Packaging and Shipping of Copper Tube Terminals

Copper Tube Terminals are securely packaged and shipped to ensure they arrive in pristine condition to their final destination. The packaging process includes the following steps:

Copper Tube Terminals are wrapped in a protective material to prevent any damage.

The terminals are securely placed inside a corrugated cardboard box.

The box is sealed with adhesive tape to protect the contents.

The box is labeled with an address label and barcode.

The box is shipped via an appropriate carrier.

FAQ:

Q1: What is the Brand Name of Copper Tube Terminals?

A1: The Brand Name of Copper Tube Terminals is TLC.

Q2: What is the Model Number of Copper Tube Terminals?

A2: The Model Number of Copper Tube Terminals is TYF and T.

Q3: Where is Copper Tube Terminals manufactured?

A3: Copper Tube Terminals is manufactured in China.

Q4: What certifications does Copper Tube Terminals have?

A4: Copper Tube Terminals has UL, CUL and CE certifications.

Q5: How many Copper Tube Terminals can be supplied per month?

A5: The Supply Ability of Copper Tube Terminals is 800K pcs per month.
