

10-35mm² 1000-Pack Copper 90 Degree Cable Lugs 90D Terminal Lugs Tube Lugs

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: TLC
- Certification: UL, CUL, CE
- Model Number: 90D
- Minimum Order Quantity: 1000
- Price: USD
- Packaging Details: bag, Carton package
- Delivery Time: 5-30 working days
- Payment Terms: T/T
- Supply Ability: 500K pcs per month

Product Specification

- Product Name: 90 Degree Cable Lug
- Finish: Tin Plated
- Package Quantity: 1000-10pcs
- Shape: Lug
- Color: Silver
- Material: Copper
- Temperature Rating: -40-105°C
- Highlight: **TLC 90 Degree Cable Lug 35mm²,
TLC 90 Degree Cable Lug 10mm²,
10mm² 90D copper tube terminals**

Non-Insulated - Copper Lugs

T90° LUGS TERMINALS

Material
Terminal Body: Copper
Plating: Tin

TLC TERMINALS INC.
Terminals

145

Product Description:

Lugs terminals are critical components in electrical systems. They are used to **join wires or cables to various electrical devices or equipment**.

Lugs are small metal connectors that are *crimped or soldered onto the ends of wires*. These **specialized metal connectors** are specifically designed to ensure a *stable and reliable connection with terminals*.

Due to the wide range of wire gauges and terminal types, different shapes and sizes of lugs are available.

Features:

Lugs terminals are a must-have in any electrical system. They provide secure and dependable connection points between wires, cables and electrical equipment. They facilitate the safe transmission of electricity, ensuring optimal electrical performance and safety. Proper installations of these lugs are critical in order to keep the system running efficiently and safely.

The assembly of lugs and mechanical terminations require meticulous attention to detail. Poorly installed lugs can lead to loose connections that can lead to arcing, overheating, and even fire. In addition, lugs that are too large or too small for the application can cause unnecessary stress on cables and connections that can lead to failure.

To ensure the safety of an electrical system, lugs must be properly installed. It is generally best to hire a qualified electrician for this task, as he or she can properly assess the job and determine the best lugs for the application. This approach ensures that the electrical system works efficiently and safely.

Applications:

For safe and effective transfer of electrical power or signals between devices, a strong and stable electrical connection is important. Combination of lugs and terminals provides just that. When properly installed, they help create a reliable connection, avoiding overheating, poor performance, and electrical failures.

Specifically, lugs and terminals secure both ends of the electric path, preventing loose connections and ensuring reliable transfer of current. As such, it is essential that they are correctly installed, so that the connection is properly made, allowing for more efficient and safer electrical transfer.

Support and Services:

We provide technical support and service for our 90 Degree Cable Lug product. Our team of professionals is always available to answer any questions or concerns you have about the product. We also offer a warranty on our products to ensure that you are satisfied with your purchase. Our team is dedicated to making sure you are completely satisfied with your purchase and that you get the best performance possible.

We are committed to providing the best customer service possible. If you have any questions or concerns, please do not hesitate to contact us. We will be more than happy to help you find the right solution for your needs.

We also offer a wide range of accessories and parts for our 90 Degree Cable Lug product. Our knowledgeable staff can assist you in finding the right parts for your specific needs. We offer a variety of options from our extensive inventory to make sure you get the best fit for your application.

Packing and Shipping:

90 Degree Cable Lug will be packaged in a well-sealed plastic bag and then placed in a cardboard box. The box will be labelled with the product name and a description of its contents, as well as any other necessary information. The box will then be secured with packing tape for added protection during shipping.

The product will be shipped via a reputable courier service. It will be insured for the full value of the goods in case of loss or damage during transit. The tracking number will be provided to the customer upon shipment.

FAQ:

Q: What is the brand name?

A: The brand name is TLC.

Q: What is the model number?

A: The model number is 90D.

Q: Where is the place of origin?

A: The place of origin is China.

Q: What is the certification?

A: The certification is UL, CUL, CE.

Q: What is the minimum order quantity?

A: The minimum order quantity is 1000.

Q: What is the price?

A: The price is USD.

Q: What is the packaging details?

A: The packaging details are bag, Carton package.

Q: How long is the delivery time?

A: The delivery time is 5-30 working days.

Q: What is the payment terms?

A: The payment terms is T/T.

Q: What is the supply ability?

A: The supply ability is 500K pcs per month.
