

8-35mm² Silver -40-105°C Lug Cable Connector Copper Tube Terminal Lugs 90D

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: TLC
- Certification: UL, CUL, CE
- Model Number: 90D
- Minimum Order Quantity: 1000
- Price: USD
- Packaging Details: bag, Carton package
- Delivery Time: 5-30 working days
- Payment Terms: T/T
- Supply Ability: 500K pcs per month

Product Specification

- Finish: Tin Plated
- Temperature Rating: -40-105°C
- Shape: Lug
- Material: Copper
- Package Quantity: 1000-10pcs
- Color: Silver
- Product Name: 90 Degree Cable Lug
- Highlight: 8mm² 90 degree terminal lugs,
TLC Copper Tube Terminal Lugs 90D,
Copper Tube Terminal Lugs 90D TLC

Non-Insulated - Copper Lugs

TUBULAR LUGS TERMINALS

Material
Terminal Body: Copper
Plating: Tin

Product Description:

Lugs terminals are an indispensable part of electrical systems.

They are used to join wires and cables to different electrical appliances or devices in a safe and reliable way.

The terminals come in assorted sizes and forms in accordance with various wire diameters and terminal varieties.

These lugs are constructed of metal and are attached to the ends of wires either by crimping or soldering.

Features:

Lugs terminals are crucial components in electrical systems that serve to establish secure and dependable connections between wires or cables and electrical devices or equipment. Installing these correctly is essential for the optimal performance and safety of the electrical system.

Incorrectly installed lug terminals can lead to equipment failure, electrical short-circuits, consequential fires, and other serious incidents. For this reason, they must be properly installed to guarantee safe and electricity-efficient operations.

Given the importance of lug terminals, it is important to pay attention when selecting the correct variant. One must consider the application's needs, such as whether it involves a low- or high-ampacity application, whether it requires a fine-stranded or standard wire, and the type of environment in which the lug terminal will be used.

Applications:

In order to ensure a strong, stable connection of electricity, lugs and terminals must be used together. This is incredibly important for the effective transfer of electricity or signals from one device to another. Moreover, if lugs and terminals are correctly installed, the likelihood of loose connections is greatly reduced, consequently avoiding any potential issues such as poor function, excessive heat, or complete electric failure.

Support and Services:

90 Degree Cable Lug Technical Support and Service

We provide technical support and service for our 90 Degree Cable Lug.

Our team of experts are available to answer any questions you may have about installation, operation, and troubleshooting.

We also provide replacement parts and repairs when needed.

If you have any questions or need assistance, please do not hesitate to contact us.

Packing and Shipping:

Packaging and Shipping for the 90 Degree Cable Lug:

The 90 Degree Cable Lug will be packaged in corrugated cardboard boxes or wooden cases depending on the size and quantity. All products will be bubble wrapped and secured to prevent any damage during transit. Shipping will be done through a reliable courier service. The transit time will depend on the destination.

FAQ:

Q1. What is the brand name of 90 Degree Cable Lug?

A1. The brand name of 90 Degree Cable Lug is TLC.

Q2. What is the model number of 90 Degree Cable Lug?

A2. The model number of 90 Degree Cable Lug is 90D.

Q3. What is the place of origin of 90 Degree Cable Lug?

A3. The place of origin of 90 Degree Cable Lug is China.

Q4. What certifications does 90 Degree Cable Lug have?

A4. 90 Degree Cable Lug has UL, CUL, CE certifications.

Q5. What is the minimum order quantity of 90 Degree Cable Lug?

A5. The minimum order quantity of 90 Degree Cable Lug is 1000 pcs.
