

6-50mm² Silver Cable Lugs DT Lugs Terminals Non Insulated Cable Lugs Long Locking Lugs

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: TLC
- Certification: UL, CUL, CE
- Model Number: DT, HUP
- Minimum Order Quantity: 1000
- Price: USD
- Packaging Details: PE bag, Carton
- Delivery Time: 5-30 working days
- Payment Terms: T/T
- Supply Ability: 300-800K pcs per month

Product Specification

- Surface Treatment: Tin Plated
- Current Rating: High
- Material: Copper
- Product Name: Cable Lugs
- Color: Silver
- Type: Crimped
- Application: Electrical Connections
- Packaging: Bag, Box, Carton
- Highlight: 50mm² cable crimping lugs,
6mm² cable crimping lugs,
50mm² Non Insulated Cable Lugs

Non- Insulated - Copper Lugs

DT LUGS TERMINALS

Material
Terminal Body: Copper
Plating: Tin

Product Description:

Lugs Terminal

Lugs terminals are important components in electrical systems that provide secure and reliable connections between wires or cables and electrical devices or equipment. It is essential that they are installed properly in order to achieve optimal electrical performance and safety. Lugs terminals can be made of copper, aluminium or stainless steel that provide maximum flexibility, range of applications and design options. They are coated with tin, cadmium or silver mixed alloys to guarantee maximum corrosion protection. Lugs terminals are used in a wide variety of applications, such as submarines, switchboards, power supply systems, renewable energy sources and medical equipment.

Features:

The combination of lugs and terminals offers great advantages in terms of creating strong and stable electrical connections. This is vitally important for delivering electrical power or signals efficiently between devices. An appropriately fitted lugs and terminals setup helps to avoid unforeseen problems like loose connections, which, left unattended, can hinder performance, cause overheating, or even cause electrical breakdowns.

Applications:

Lugs terminals are essential components in electrical systems, since they play an important role of connecting wires or cables to the various electrical devices or equipment.

These same lugs are small metal connectors that are crimped or soldered onto the ends of wires, making them reliable and secure connection to different terminals. Plus, they come in various sizes and shapes in order to adapt to different wire gauges and terminal types.

Support and Services:

Mechanical Cable Lugs Technical Support and Service

Our team of experts is dedicated to providing our customers with the best technical support and service when it comes to Mechanical Cable Lugs. We will assist you with design, installation, and maintenance of Mechanical Cable Lugs so you can get the most out of your product.

Our technical support and service includes:

Providing technical advice and assistance with design, installation, and maintenance of Mechanical Cable Lugs

Conducting comprehensive tests and inspections to ensure product quality and performance

Offering troubleshooting and problem-solving services

Providing product updates and upgrades

Providing training and education in the use and maintenance of Mechanical Cable Lugs

At all times, our technical support and service team is available to answer your questions and provide guidance. Contact us today to learn more about our Mechanical Cable Lugs technical support and service.

Packing and Shipping:

Packaging and Shipping of Mechanical Cable Lugs

Mechanical cable lugs are packaged and shipped in accordance with industry standards. The lugs are inspected for any defects or damage before being securely packaged in plastic bags or cardboard boxes. The packages are then sealed for protection and shipped to the customer.

The packages are shipped using a reputable carrier such as FedEx or UPS. The tracking number is provided to the customer so that they can track the package in transit. The package is delivered to the customer's specified address in the time frame specified by the customer.

Upon delivery, the customer should inspect the package for any damage. If any damage is found, the customer should contact the carrier immediately to file a claim. The customer should also inspect the contents of the package to ensure that all items are in good condition.

FAQ:

Q: What is the brand name of Mechanical Cable Lugs?

A: The brand name of Mechanical Cable Lugs is TLC.

Q: What are the model numbers of Mechanical Cable Lugs?

A: The model numbers of Mechanical Cable Lugs are DT and HUP.

Q: Where is the place of origin of Mechanical Cable Lugs?

A: The place of origin of Mechanical Cable Lugs is China.

Q: What are the certifications of Mechanical Cable Lugs?

A: The certifications of Mechanical Cable Lugs are UL, CUL and CE.

Q: What is the minimum order quantity of Mechanical Cable Lugs?

A: The minimum order quantity of Mechanical Cable Lugs is 1000.
